

BioBlend Renewable Resources is the one-stop resource for organizations that demand high performance lubricants free from pricy, imported petroleum. Adopting BioBlend products signals a sincere commitment to sustainable and environmentally sound business practices. Backed by the resources and expertise of Archer Daniels Midland (ADM) a Fortune 100 company and the world's largest agricultural producer, BioBlend products are rapidly becoming the lubrication of choice for today's top companies.

Better Business

The fact is, all companies use lubricants to reduce corrosion and wear, lower friction and heat, extend equipment life, and improve performance. From the office elevator to the drilling platform, from the industrial kitchen to the construction site, the 38.5 billion ton global lubricants industry greases the tracks for all types of business.

When you factor in better performance, improved sustainability, and superior environmental characteristics of renewable, bio-based lubricants from BioBlend Renewable Resources, choosing BioBlend products is one green decision that's easy to green-light. Our clients recognize the value of informing their customers that they're making environmentally responsible lubrication choices and moving away from petroleum based resources. BioBlend's entire product line is domestically produced and sustainable.

Better Performance

The BioBlend research and development laboratory in Joliet, Illinois excels at the science of bio-based, biodegradable lubrication formulation and application. BioBlend products outperform many petroleum-based products—not just in laboratory tests, but in the grit and grind of real world conditions. Our full line of industrial biodegradable lubricants are specifically engineered to be the finest chain, rock drill, form release, or food grade oils available, and come in aerosol, oil and grease formulations that perfectly fit your application.

Better Risk Management

Smart companies choose BioBlend over traditional petroleum-based lubricants because of the dramatic reduction in business risk. Biodegradable lubricants have numerous benefits to offer responsible organizations, including:

1. **Better employee safety.** Relative to most petroleum-based lubricants on the market, BioBlend formulations are lower in toxicity
2. **Sustainability.** BioBlend products are domestically produced, green alternatives to imported, petroleum-based lubrication.
3. **Environmental Performance.** Our products reduce water contamination and site remediation concerns. Adopting BioBlend for your organization will not only protect your equipment—it will protect the planet.

National Distributor Network

It's simple to make the switch to BioBlend, thanks to our large and growing network of quality distributors. Wherever you need quality lubricants that you and your business will be proud to use, you'll find a local BioBlend distributor. A detailed map with each distributor's location and contact information is available on our web site at www.bioblend.com.
